Company

Texelia AG

Business Activity

Texelia delivers IT expertise and project management to the most demanding organizations. By helping leaders in research, innovation and high-quality delivery, we contribute to the production of common goods which are central to sustainable well-being, such as health, mobility and public services.

Focus R&D

Texelia participates in R&D projects focused on Data Science and Complex Systems techniques applied to research challenges in Life Sciences, particularly biomedical challenges related to neuroscience and ageing.

Philosophy

We are proud of our heritage and entrepreneurial spirit, and the best way to renew it is to address the challenges of IT with an holistic approach which is the Triple Helix of our logo: every project today requires attention at the same time in the three dimensions of Processes and Accuracy, Data and Relevance, Tempo and Agility. Not the least, Texelia is a genuine Swiss company open to multicultural and interdisciplinary talent. The world is complex, and that makes it so rich and exciting.
